okay so I just put in in this example I would talk about Valencia the city which has the city of arts and sciences it attracts thousands of visitors and it was designed by a local architect called Calatrava and here interestingly quite a lot of people in Valencia actually hate this guy because all the money the local government was spending on this could have been spent on schools and hospitals and things like that and that's a whole other issue which I'm not going to mention here I'm just going to keep it to this this is my argument I'm not going to mention the issues local issues in Valencia it's got nothing to do with this it is related but not entirely related to this [anger management essay](#) so I'm going to keep on topic there's nothing that's going to distract me while I construct this paragraph so next one nowadays people have free access to music and films online is this a positive or negative development provide relevant examples from your own experience now be careful if I start talking about yesterday I downloaded a song for free on my laptop it doesn't sound academic okay and it is from my own experience and it did happen yesterday I'm just saying however that's not what we want from my own experience I live from my own knowledge about online music from my own knowledge about the film industry okay not my own personal experience I'm not going to talk about my brother David who downloaded three mp3's and it turned out to be Elton John he wanted Bruce Springsteen I'm not going to talk about these personal examples or stories I'm going to talk about my own experience but I'm going to talk about my own knowledge of this industry and this way I avoid falling into the trap that I see in so many essays that talks about my sister once downloaded an mp3 and that's terrible okay so by the way I forgot to mention in the online course we're going through this process into a lot more detail and it's very easy to follow and if so if you're struggling with this part of the exam then the online course would help you a lot so let's go into my answers first of all I'm going to take a position okay is this a positive or negative development it's asking me directly so I'm just going to take the position very very sort of like simple and I'm not going to look at both sides I'm just going to say it's a negative development okay you want my answer this is it it's negative and I'll tell you why okay I might sound angry but I'm not I'm just like I just want to be quite clear and straightforward with this type of question that's what it's asking so let's go free access means the artists are not getting their royalties this could be argued as stealing so here you can see it's not grammatically perfect but these are my notes later I'm going to transform these notes into coherent paragraphs and that is very very easy to do
